

HIS NEED. YOUR GIFT.

HIS NEED. YOUR GIFT.

One billion people do not have access to clean drinking water. Women in rural Africa walk an average of four hours to collect contaminated water for their families. And a child dies every twenty seconds from a water-related illness like diarrhea.

It doesn't have to be this way.

This Lent, our congregation is joining Water to Thrive to help Quench the Thirst. It costs just \$5000 to build a well that will last a generation.

Build a well. Change a life.
