

About Water to Thrive

Water to Thrive is a faith-based non-profit that focuses on bringing clean safe water to rural communities in Africa, primarily Ethiopia, Uganda, and Tanzania. We do this with water projects — hand-dug wells, spring protection systems, and borehole wells — located in the communities with need. On average, our projects cost about \$10 per community member. Hundreds of thousands of people in rural Africa are enjoying clean safe water for the first time in their lives because of caring people just like you.

water to thrive
BUILD WELLS CHANGE LIVES

Worldwide, nearly a billion people lack access to clean, safe water. More than a third of that number lives in East Africa.

Diseases from unsafe water and lack of basic sanitation kill more people every year than all forms of violence, including war.

Children are especially vulnerable, as their little bodies aren't strong enough to fight diarrhea, dysentery, and other illnesses. Every 21 seconds, somewhere in the world, a child dies from a water-related disease.

A lack of access to clean water limits community development and economic growth. The cycle of poverty will not break until this changes.

Water to Thrive is transforming lives in rural Africa by bringing the sustainable blessing of clean, safe water to communities who need it most.

BUILD WELLS

Clean water reduces poverty, improves health, increases access to education, and saves lives.

The average hand-dug well costs \$5,000 and provides at least 500 people with clean, safe water for 20 years.

CHANGE LIVES

Give

Thanks to our generous donors, in its first decade, Water to Thrive has built nearly 1,000 wells bringing water to more than 500,000 people.

Every drop counts —\$10 brings clean water to one person, and \$70 can help a family of seven.

And through our Drop by Drop Fund, every dollar given to operational support has a \$6 impact on water project work.

Become a Water Angel

Water Angels are a special group of supporters committed to giving \$1,000 or more each year. Our Water Angels play a critical role in helping us fulfill our mission by funding W2T operations, partnerships, fundraising, and travel in the field.

Start a Well-Building Campaign

With our tools and support, you can run your own fundraising campaign to bring clean, safe water to rural Africa. Raise \$5,000 for a full water project.

Be an Ambassador

The Water to Thrive Ambassador Program helps spread our mission nationwide. Ambassadors inspire, educate, and motivate their communities to do something about the global water crisis.

Spread the word

Help us tell the story of the need for clean, safe water in Africa and how we can achieve it. Use our resources to share information. Share our social media posts. Start conversations.

Our commitments

Sustainability

We work with local organizations that have close ties to the communities we serve and that share our vision for long-term success.

Education

Every water project includes Water, Sanitation, and Hygiene (WASH) training for the community.

Transparency

Every penny of every donation earmarked for water goes directly to the water projects. Donors receive regular updates that include GPS coordinates, progress reports, photos, and completion reports.
