

The average hand-dug well costs \$5,000 and provides at least 500 people with clean, safe water for 20 years. On average, a gift of just \$10 can provide clean water for one person. To start changing lives now, scan the QR code below to give for clean water today.

Hundreds of thousands of people in rural Africa are enjoying clean water for the first time in their lives because of caring people just like you. Thank you.

water to thrive
BUILD WELLS CHANGE LIVES

Worldwide, nearly a billion people lack access to clean, safe water. More than a third of those people live in East Africa.

Diseases from unsafe water and a lack of basic sanitation kill more people every year than all forms of violence, including war.

Children are especially vulnerable, as they are more susceptible to dehydration, which is caused by waterborne illnesses such as diarrhea and dysentery. Every 21 seconds, somewhere in the world, a child dies from a waterborne illness.

A lack of access to clean water also limits community development and economic growth. The long walks to collect water endanger women and girls and keep children from attending school.

Clean water improves health, breaks the cycle of poverty, empowers women, increases access to education, and brings hope for a better future.

BUILD WELLS

Water to Thrive is a faith-based non-profit bringing clean water to communities in Ethiopia, Uganda and Tanzania. We implement water projects — hand-dug wells, spring protection systems, and borehole wells — in rural villages, where the need for water is the greatest.

Give

Thanks to our generous donors, since 2008, Water to Thrive has built nearly 1,200 wells, bringing water to more than half a million people. Every drop counts — \$10 brings clean water to one person, and \$70 can help a family of seven.

Become a Water Guardian

Water Guardians are a special group of supporters committed to giving whatever they can on a monthly basis to support our Drop by Drop Fund. Our Water Guardians play a critical role in sustaining our mission by funding operations, partnerships, and fundraising efforts. To learn more, visit watertothrive.org/everymonth.

Launch a Fundraiser

With our tools and support, you can run your own fundraising campaign to bring clean, safe water to rural Africa. Raise \$5,000 for a full water project, and know that with our 100 Percent Promise, every dollar given for water goes directly to fund water. To launch your campaign today, visit watertothrive.org/get-involved/support/campaigns/launch-a-water-campaign/.

Spread the Word

Become an Ambassador, educating others about the global water crisis and motivating them to take action. Email team@watertothrive.org to request to join our Ambassador program. Follow us on Facebook, Instagram and Twitter @WaterToThrive. Share our posts. Help us start conversations.

CHANGE LIVES

Our commitments

Sustainability

We work with local organizations that have close ties to the communities we serve. Every beneficiary community receives comprehensive Water, Sanitation, and Hygiene (WASH) training to learn how to maintain their new well.

Empowerment

We encourage the communities we serve to take ownership of their new well by involving them in the construction process from start to finish. Each community elects a water committee made up of at least 50% women to make important decisions about the well.

Transparency

100% of every donation for water goes directly to the water projects. Donors receive regular updates from the field, including the GPS coordinates of the well they funded, construction progress reports, photos, and a final completion report.
